About This Software

A rocky reef off the coast of Italy demonstrates the future of climate change. Meet Dr. Fio Micheli, the marine scientist who studies this reef, and dive underwater with her to learn about ocean acidification and how human-produced carbon dioxide will turn all the world's oceans into what scientists are calling "the ocean moonscape."

The Crystal Reef is 360-degree video experience that tackles communicating climate change in an immersive and scientifically valid way by the combining the virtual reality expertise of Stanford's Virtual Human Interaction Lab (VHIL) along with the research of the marine science experts at Hopkins Marine Station.

Drastic change in conservation behaviors can sometimes require unrealistic access to places or experiences that are impossible for the general public. This is additionally the case in marine science, which suffers from communication problems because many of its ecosystems are only directly accessible to coastal citizens, able scuba divers or aquarium visitors. The complexity of

climate change and ocean acidification also makes it difficult for the public to grasp its scope. The Crystal Reef is a story that aims to reduce both of those access barriers.

Title: The Crystal Reef
Genre: Education
Developer:
Cody Karutz, Lauren Knapp, Jeremy Bailenson
Publisher:
Virtual Human Interaction Lab
Release Date: 13 Apr, 2016

ARMOUR COVERAGE STATISTICS

COVERAGE ASPECTS:

BLUNT	Blunt attacks
POINT	Point (stab) attacks
SQUEEZE	Squeezing attacks
EDGE	Edge attacks
TEAR	Tear (bite/claw) attacks
WARMTH	Protection against cold
AVERAGE	Average (excluding warmth)

OVERALL ARMOUR COVERAGE

...against: WARMTH

INFERIOR PROTECTION

AVERAGE PROTECTION

SUPERIOR PROTECTION

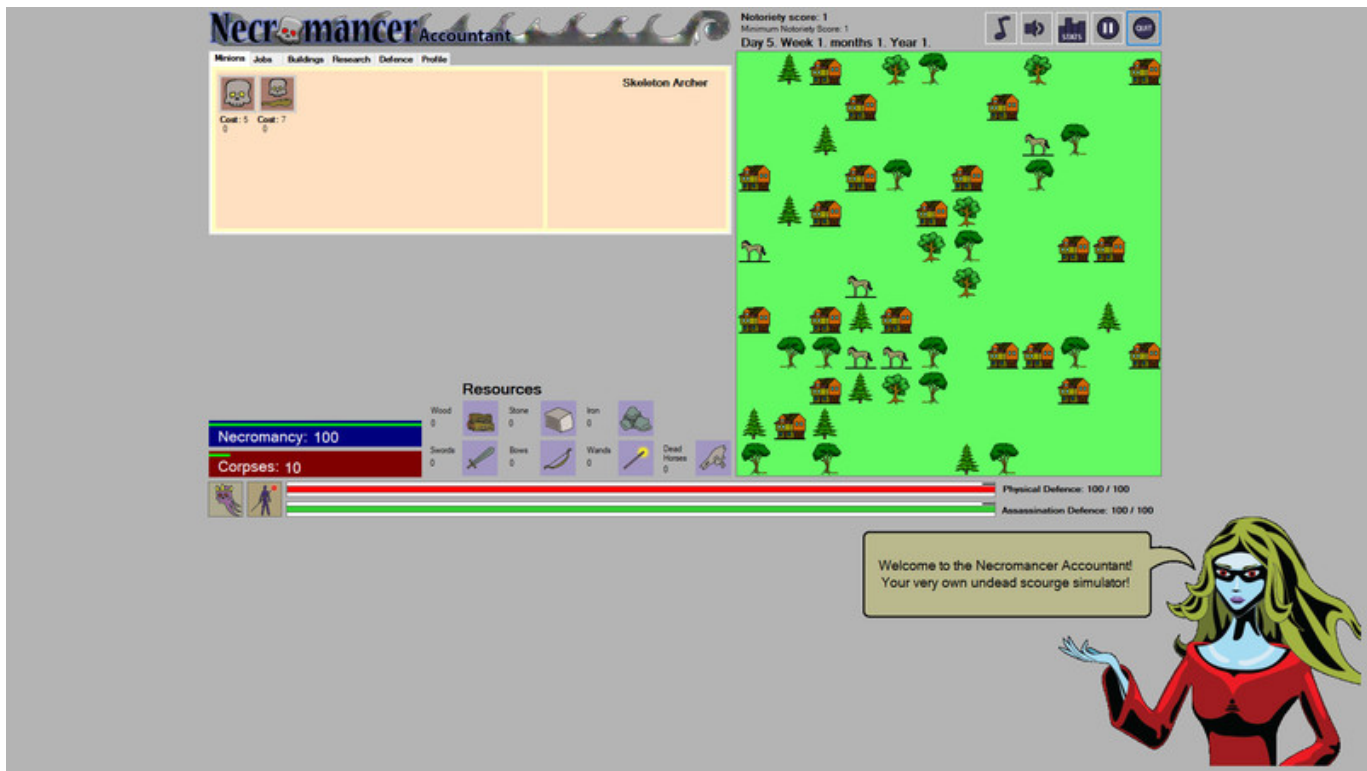

ESC Exit

Various coverage aspects show your armour protection against different kind of attacks. Some armours can be very protective against some attacks but can't maybe absorb other kind of attacks at all. This is mostly a matter of armour material. See more information from the game info browser.

ARMOUR MATERIALS

Coverage against specific attacks depends on the armour material.
